16 personalities:

My personality type, according to the test results, is virtuoso. This type of personality is characterized for being practical, independent and assertive. This presents several reasons to succeed, such as finding solutions in any context, being resourceful and realistic to present challenges and not depending on others to achieve things. On the other side, this may present opportunities to strive, especially regarding relationships with other peers and their needs in the process.

Description of myself (hopefully) en 5 years:

In 5 years i would like to have enough experience and a vast network on the sector to be able to bring one of my many ideas to life in the form of a startup, the fast paced, multifaceted and stressful startup culture is something i've been always attracted to, the fact of starting from an idea, pivoting, getting users, and having to quickly solve many issues that surface is something i think i would like a lot. (maybe not but i won't know until i try it).
